A family guide to the proposed school changes

Every school is a community. A school change can affect friendships, routines, programs, and a family's sense of belonging. This guide explains what is proposed and why.

Scenarios A and B are proposals, not final decisions. "No changes proposed" means these options do not include a change for that school.

Each school has a snapshot and a box explaining the reasons for the proposal. The next page shows enrollment estimates, programs, student groups, and maps. Estimates cover 2027-28 through 2031-32. They are not current student counts.

The possible benefits are goals. A larger school does not automatically get a full-time librarian, certain staff, or specific programs. Those details depend on the district's staffing rules, budget, and plans for making the changes.

A school or program move does not determine where an individual student receiving special education services will go. Families and school teams would need to plan each student's services and support.

The school details, numbers, and maps come from PPS school profiles. This guide explains that information in simpler language.

Words you may see in this guide

No changes

What is expected if the district keeps the current schools and programs.

Option A / Option B

The two scenarios. "A and B" means the same information applies to both.

School boundary

The area used to assign students to a neighborhood school based on where they live.

School communities joining

Students from two or more schools would come together. The proposal says which school building would close.

Programs joining

A program would come together at one school or move to another school.

DLI

Dual Language Immersion: learning in English and another language.

School size goal

More than 360 students for K-5 schools; more than 500 for K-8 or middle schools; more than 1,100 for high schools. These are planning goals, not ratings of school quality.

Space use goal

The district aims to use 70%-100% of a school's available room for students. A "No" can mean the school is below or above that range.

Title I

Federal money that supports schools serving students from low-income households. The guide shows the expected designation.

IEP

An Individualized Education Program: a written plan for a student's special education services and support.

Choice program

A program with a special focus, such as arts or science. It may serve families beyond a neighborhood school boundary.

Student groups

Groups can overlap. Do not add the percentages together.

**You may notice slight differences in student numbers and/or demographics in schools that don't experience change because a focus option school has changed and we assume that students return to their neighborhood school.*

BEVERLY CLEARY

School proposal | Options A and B

SCHOOL SNAPSHOT	DETAILS
Current program	K-8 neighborhood
Expected enrollment with no changes	430 in 2027-28; 389 in 2031-32
District school size goal	More than 500 students
Students living within 1 mile	93.5%
Building notes	Repair needs are described below.

WHY IS PPS CONSIDERING THIS?

Central location and space: Beverly Cleary has plenty of space and a central location to serve elementary students.

Major seismic construction: Planned seismic upgrades make changing to K-5 ideal to reduce the need for middle grade students to move to temporary buildings during construction.

This is a proposal, not a final decision.

What is being proposed?

Beverly Cleary would change from a K-8 school to a neighborhood K-5 school.

Middle grade (6th-8th) students would move to Beaumont Middle School.

Beverly Cleary's boundary would expand to include K-5 students from the Irvington neighborhood.

What could students gain?

School designed for younger students: Elementary students benefit from a school focused entirely on K-5 learning and development. Enough students to support programs: By combining Irvington and Beverly Cleary K-5, students and families will benefit from long-term steady student numbers. Safe and improved building: Once seismic upgrades are completed in the summer of 2028, both communities will benefit from a seismically safe school with upgraded spaces. Full middle school options: 6th-8th graders gain access to comprehensive middle school electives, sports programs, and activities at Beaumont. Swing Site Considerations: Evaluation will take place to determine if the current Irvington site can house both communities for the 27-28 school year while the Beverly Cleary site undergoes construction.

What else was considered?

Avoiding temporary moves: Moving middle grade students to Beaumont in Fall 2027 significantly reduces how many students need to move to temporary sites during construction.

Chosen over Irvington: Beverly Cleary was selected over Irvington because it is more central and its planned building upgrades will create an improved space for Irvington students.

What about special education?

Students who receive specialized programming in a closing school/grade band will be assigned a new location for their IEP-identified services. The 6–8 Intensive Skills Classroom currently located at Beverly Cleary will be relocated to Harriet Tubman Middle School. When combining school communities with distinct Special Education programming, we are planning and ensuring tailored support through the transition.
