

RIGHTSIZE. RIGHT SUPPORT. **RIGHT** *for* **STUDENTS.**

A family guide to the proposed school changes

Every school is a community. A school change can affect friendships, routines, programs, and a family's sense of belonging. This guide explains what is proposed and why.

Scenarios A and B are proposals, not final decisions. "No changes proposed" means these options do not include a change for that school.

Each school has a snapshot and a box explaining the reasons for the proposal. The next page shows enrollment estimates, programs, student groups, and maps. Estimates cover 2027-28 through 2031-32. They are not current student counts.

The possible benefits are goals. A larger school does not automatically get a full-time librarian, certain staff, or specific programs. Those details depend on the district's staffing rules, budget, and plans for making the changes.

A school or program move does not determine where an individual student receiving special education services will go. Families and school teams would need to plan each student's services and support.

The school details, numbers, and maps come from PPS school profiles. This guide explains that information in simpler language.

Words you may see in this guide

No changes

What is expected if the district keeps the current schools and programs.

Option A / Option B

The two scenarios. "A and B" means the same information applies to both.

School boundary

The area used to assign students to a neighborhood school based on where they live.

School communities joining

Students from two or more schools would come together. The proposal says which school building would close.

Programs joining

A program would come together at one school or move to another school.

DLI

Dual Language Immersion: learning in English and another language.

School size goal

More than 360 students for K-5 schools; more than 500 for K-8 or middle schools; more than 1,100 for high schools. These are planning goals, not ratings of school quality.

Space use goal

The district aims to use 70%-100% of a school's available room for students. A "No" can mean the school is below or above that range.

Title I

Federal money that supports schools serving students from low-income households. The guide shows the expected designation.

IEP

An Individualized Education Program: a written plan for a student's special education services and support.

Choice program

A program with a special focus, such as arts or science. It may serve families beyond a neighborhood school boundary.

Student groups

Groups can overlap. Do not add the percentages together.

**You may notice slight differences in student numbers and/or demographics in schools that don't experience change because a focus option school has changed and we assume that students return to their neighborhood school.*

WHITMAN

School proposal | Options A and B

SCHOOL SNAPSHOT	DETAILS
Current program	K-5 neighborhood
Expected enrollment with no changes	205 in 2027-28; 223 in 2031-32
District school size goal	More than 360 students
Students living within 1 mile	81.4%
Building notes	Building updates are described below.

WHY IS PPS CONSIDERING THIS?

Low neighborhood enrollment: Both Whitman and Woodmere are significantly under district enrollment goals, with Woodmere's enrollment remaining in the low 220s.

Central school space: Whitman has room for 416 students, and receiving students from Woodmere makes better use of school space in a centrally located school with planned schoolyard improvements.

This is a proposal, not a final decision.

What is being proposed?

Whitman would remain open as a neighborhood K-5 school and expand its school boundary to receive 100% of the student from the closing Woodmere k-5 school in Scenario A and B, in Scenario B, Lewis remains open and a portion of the Whitman boundary moves to Lewis. Middle and high school pathway: All students in this new boundary move to Brentwood Middle School and then to Franklin High School.

What could students gain?

Upgraded school grounds: Benefit from planned schoolyard improvements and a central location. Combined school strength: Combining both schools helps keep student numbers steady, allowing for stronger learning options, focused staff and upgraded learning environments.

What else was considered?

Whitman chosen over Woodmere: Whitman was chosen over Woodmere because of being more central to where students live and having similar amounts of space and building conditions.

What about special education?

As an inclusive neighborhood school, the Whitman community has led significant work to support all students with disabilities in their neighborhood school. This will continue moving forward as Whitman welcomes the Woodmere community.

The Communication Behavior (CB) Classrooms currently located at Woodmere will be relocated to Kelly Elementary. Portland Public Schools will maintain the complete continuum of Special Education services throughout the rightsizing process, ensuring programming is available in all regions of the District. The Special Education Department will collaborate with school teams and families to identify individual student placements for the upcoming school year:

- Continued Focused Programming: Provided in the CB Classrooms at Kelly Elementary.
- Transition to Whitman Elementary: Joining an inclusive neighborhood school environment with their peers.

School teams will contact families in the coming weeks to discuss individual transition plans and answer any questions. Thank you for your ongoing partnership.
